CYTOCHROME OXIDASE: STRUCTURE, FUNCTION, AND PHYSIOPATHOLOGY[a]

Editors
MAURIZIO BRUNORI AND BRITTON CHANCE

Advisory Board
A. AZZI, M. BRUNORI, R. A. CAPALDI, S. I. CHAN, B. CHANCE, B. G. MALMSTRÖM, M. T. WILSON, AND M. K. F. WIKSTRÖM

CONTENTS

Preface. *By* MAURIZIO BRUNORI and BRITTON CHANCE ix

Part I. Structural Properties and Spectroscopy of Active Sites

Chairman's Introductory Remarks. *By* HELMUT BEINERT 1

Subunit Composition of the Transmembrane Parts of Beef Heart Cytochrome *c* Oxidase. *By* YU-ZHONG ZHANG and RODERICK A. CAPALDI 3

On the Origin and Functional Unit of Cytochrome *c* Oxidase. *By* G. BUSE, S. HENSEL, and G. C. M. STEFFENS 8

Subunit I Is the Catalytic Center of *Paracoccus denitrificans* Cytochrome *c* Oxidase. *By* M. MÜLLER and A. AZZI 13

Metals of Bovine Heart Cytochrome *c* Oxidase. *By* GERALD L. YEWEY and WINSLOW S. CAUGHEY 22

Isolation and Partial Sequence of the A-Protein Gene of *Thermus thermophilus* Cytochrome c_1aa_3. *By* J. A. FEE, M. W. MATHER, P. SPRINGER, S. HENSEL, and G. BUSE 33

The Variety of Molecular Properties of Bacterial Cytochromes Containing Heme *a*. *By* TATEO YAMANAKA, YOSHIHIRO FUKUMORI, MASAHIKO NUMATA, and TAKESHI YAMAZAKI 39

Some Spectroscopic Views of the Cu_A Site in Cytochrome *c* Oxidase Preparations. *By* C. GREENWOOD, A. J. THOMSON, C. P. BARRETT, J. PETERSON, G. N. GEORGE, J. A. FEE, and J. REICHARDT 47

[a]This volume is the result of a conference entitled Cytochrome Oxidase: Structure, Function and Physiopathology which was held on June 20–21, 1988, in Rome, Italy. This conference was sponsored by the University of Rome "La Sapienza," the University of Rome "Tor Vergata," Consiglio Nazionale delle Ricerche, the New York Academy of Sciences, the Accademia Nazionale dei Lincei, and the International Union for Pure and Applied Biophysics.

The Binuclear Site of Cytochrome *c* Oxidase: Structural Evidence from Iron X-ray Absorption Spectroscopy. *By* ROBERT A. SCOTT, P. MARK LI, and SUNNEY I. CHAN 53

Part II. Ligand Binding and Electron Transfer

Routes of Cytochrome a_3 Reduction: The Neoclassical Model Revisited. *By* P. NICHOLLS and J. M. WRIGGLESWORTH 59

Long-Range Electron Transfer in Myoglobin. *By* J. A. COWAN, R. K. UPMACIS, D. N. BERATAN, J. N. ONUCHIC, and H. B. GRAY 68

The Kinetic Mechanism(s) of Cytochrome Oxidase: Techniques for Their Analysis and Criteria for Their Validation. *By* DAVID MYERS and GRAHAM PALMER 85

Electron Transfer from Cytochrome *c* to O_2. *By* BRUCE C. HILL 98

Intermediates in the Reaction of Reduced Cytochrome Oxidase with Dioxygen. *By* Y. ORII 105

ATP-Induced Spectral Pertubation in Cytochrome Oxidase: Kinetic Aspects and Role of Calcium Ions. *By* GIOVANNI ANTONINI, FRANCESCO MALATESTA, PAOLO SARTI, BEATRICE VALLONE, AND MAURIZIO BRUNORI 118

H_2O_2-Induced Conversion of Cytochrome *c* Oxidase Peroxy Complex to Oxoferryl State. *By* TATIANA V. VYGODINA and ALEXANDER A. KONSTANTINOV 124

Photodissociation of Cytochrome *c* Oxidase–Nitric Oxide Complexes. *By* A. C. F. GORREN, B. F. VAN GELDER, and R. WEVER 139

Spectrophotometric Characterization of Intermediate Redox States of Cytochrome Oxidase. *By* J. M. WRIGGLESWORTH, N. IOANNIDIS, and P. NICHOLLS 150

Is the Internal Electron Transfer the Rate-Limiting Step in the Catalytic Cycle of Cytochrome *c* Oxidase? *By* PAOLO SARTI, GIOVANNI ANTONINI, FRANCESCO MALATESTA, BEATRICE VALLONE, and MAURIZIO BRUNORI 161

Electron Transfer and Conformation States in Bovine Cytochrome *c* Oxidase. *By* MICHAEL T. WILSON, TREVOR ALLEYNE, MICHAEL CLAGUE, KEVIN CONROY, and BASSAM EL-AGEZ 167

Part III. Bioenergetic Role and Mechanisms of Energy Transduction

Intermediate States and Electron Gating in Proton-Pumping Cytochrome *c* Oxidase. *By* BO G. MALMSTRÖM and THOMAS NILSSON 177

Possible Protonmotive Osmochemistry in Cytochrome Oxidase. *By* PETER MITCHELL 185

How Does Cytochrome Oxidase Pump Protons? A "Cooperative Proton Pump" Model. *By* MÅRTEN WIKSTRÖM 199

The Coppers in Cytochrome *c* Oxidase and the Possible Role of Cu_A in Proton Pumping. *By* SUNNEY I. CHAN 207

The Role of Water Near Cytochrome *a* in Cytochrome *c* Oxidase. *By* DENIS L. ROUSSEAU, MASSIMO SASSAROLI, YUAN-CHIN CHING, and SIDDHARTH DASGUPTA 223

Characteristics of the Protonmotive Activity of Mammalian Cytochrome *c* Oxidase and Their Modification by Amino Acid Reagents. *By* S. PAPA, N. CAPITANIO, and D. STEVERDING 238

A Strategy for Location of the Site of Proton Pumping in Cytochrome *c* Oxidase: Initial Results. *By* PETER R. RICH 254

Control of Cytochrome *c* Oxidase Activity by pH and the Electrical Potential Gradient Occurs at Separate Electron Transfer Steps and Does Not Require Subunit III. *By* L. GREGORY and S. FERGUSON-MILLER 260

Modulation of Cytochrome *c* Oxidase Activity by an Electrical Transmembrane Gradient. *By* FRANCESCO MALATESTA, GIOVANNI ANTONINI, PAOLO SARTI, BEATRICE VALLONE, and MAURIZIO BRUNORI 269

Molecular Events in Coupling and Uncoupling of Oxidative Phosphorylation. *By* GIOVANNI FELICE AZZONE and SIRO LUVISETTO 277

Part IV. Biosynthesis, Assembly, and Physiopathology

Expression and Function of Cytochrome *c* Oxidase Subunit Isologues: Modulators of Cellular Energy Production? *By* ROBERT O. POYTON, CYNTHIA E. TRUEBLOOD, RICHARD M. WRIGHT, and LYNN E. FARRELL 289

Subunit II of the *Paracoccus denitrificans* Cytochrome *c* Oxidase: Expression Studies of Its Cloned Gene in *E. coli*. *By* GUNNAR PANSKUS, PETER STEINRÜCKE, and BERND LUDWIG 308

Cytochrome *o* from *Escherichia coli* Is Structurally Related to Cytochrome aa_3. *By* MATTI SARASTE, MIRJA RAITIO, TUULIKKI JALLI, VISALA CHEPURI, LAURA LEMIEUX, and ROBERT B. GENNIS 314

Slime Mold Cytochrome *c* Oxidase: An Example of Environmental Influence on Subunit Composition of a Eukaryotic Oxidase. *By* ROBERTO BISSON and GIAMPIETRO SCHIAVO 325

Complexity of Nucleus-Encoded Genes of Mammalian Cytochrome *c* Oxidase. *By* XINAN CAO, LUDGER HENGST, ANDREA SCHLERF, MARTIN DROSTE, THOMAS MENGEL, and BERNHARD KADENBACH 337

Clinical and Biochemical Studies on Cytochrome Oxidase Deficiencies. *By* ERIC A. SCHON, EDUARDO BONILLA, ANNE LOMBES, CARLOS T. MORAES, HIROFUMI NAKASE, ROSARIO RIZZUTO, MASSIMO ZEVIANI, and SALVATORE DIMAURO 348

Mitochondrial Function in Normal and Genetically Altered Cells and Tissues. *By* B. CHANCE, R. A. WATERLAND, A. TANAKA, and R. O. POYTON 360

What Do We and What Don't We Know Today about Cytochrome *c* Oxidase? Overviews and Summaries at the Accademia dei Lincei and Discussion Meeting at Caprarola. *By* HELMUT BEINERT 374
